Resichem Chemical Protection

Resichem chemical coatings offer high performance protection from a wide range of aggressive industrial chemicals. The products ensure expensive chemical processing assets are protected from chemical attack and premature failure. The coatings have been specifically developed to cover a wide range of applications and can be applied to both metallic and cementitious surfaces. Resichem chemical protection range offers solutions that reflect the latest advances in solvent free polymer technology and take into consideration the type of surface preparation available and the customer's long term requirements.

501 CRSG

Two pack solvent free high build epoxy coating with good adhesion and chemical protection

502 CRXF

Fast curing version of 501 CRSG, touch dry 2 hours

511 UCEN

Two pack solvent free epoxy novalak capable of resisting strong acid and alkalis.

The Resimetal chemical protection range has been used in the Marine, Power, Chemical, Water and Paper industries.

Typical applications include –

Fuel tanks	Drainage channels
Bunds	Containment areas
Pipework	Structural steel
Process equipment	Chemical dykes
Treatment plants	

Features of the product range include –

- Simple use
- Excellent chemical resistance
- Brush, roller or spray applied
- Seamless finish
- Good adhesion to previously coated surfaces

Benefits to the user include –

- Guaranteed long term protection of key assets
- Reduced downtime of process equipment and production areas
- Cost effective solution
- Reduction in life cycle cost of key operating plant
